ALAA ELDIN MOHAMMED RUSHDI AL-DOHDAR

Full-Stack Web Developer | Laravel & React | Backend Developer | Computer Systems Engineer

Gaza, Palestine | +972 59 769 6155 | alaamhammad2003@gmail.com

LinkedIn: linkedin.com/in/alaa2003 | GitHub: github.com/AlaaMhammad | Portfolio: brightgaza.com/talents/477

PROFESSIONAL SUMMARY

Full-Stack Web Developer and Computer Systems Engineering graduate with 2+ years of hands-on experience building web applications and backend systems using Laravel, PHP, React, MySQL, and RESTful APIs. Strong backend focus on API development, database design, authentication and authorization, and role-based access control (RBAC), with experience in Git/GitHub, Docker, and deploying applications to live hosting environments. Delivered real-world systems across healthcare, e-commerce, project management, and SaaS. Recently expanded into practical AI integration and automation: developed AI-powered features (AI data import, AI project health analysis, AI meeting summaries) and an MCP integration with Claude for a live SaaS platform, supported by hands-on training in OpenAI API, n8n, Microsoft Power Automate, and Botpress.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, Python, HTML5, CSS3

Frameworks & Libraries: Laravel, React, Bootstrap, Tailwind CSS

Backend & APIs: RESTful API Design & Development, MVC Architecture, Eloquent ORM, Blade Templating, Authentication & Authorization, Role-Based Access Control (RBAC), Audit Logging, Payment Gateway Integration

Databases: MySQL, Redis, Database Design

AI & Automation: AI API Integration, MCP (Model Context Protocol), Claude Integration, OpenAI API, n8n, Microsoft Power Automate, Botpress, AI Workflow Automation, CRM Automation

Version Control & DevOps: Git, GitHub, GitHub Actions, Docker, CI/CD Workflows

Deployment & Hosting: Web Application Deployment, Hostinger, Database Configuration, Domain Configuration

Tools & Practices: Postman, Composer, npm, Code Reviews, Debugging & Troubleshooting, Responsive Web Design, Cross-Browser Compatibility, Remote Team Collaboration

PROFESSIONAL EXPERIENCE

Backend Developer (Part-Time)

HOSKADEV | *Remote* | *November 2025 – Present*

- Develop and maintain full-stack web applications using Laravel, PHP, React, and MySQL, with a focus on backend logic, database design, and API development.
- Build RESTful APIs and integrate them with React frontends, including authentication and authorization flows.
- Manage source code, branching, and code reviews with Git and GitHub within a distributed development workflow.
- Collaborate with cross-functional remote teams to deliver secure, maintainable web applications on schedule.

Backend API Developer (Contract)

ePluribus Health | *Remote* | *May 2026*

- Designed and developed a secure Laravel backend API with Role-Based Access Control (RBAC) for internal user management.
- Implemented audit logging for authentication events and administrative CRUD operations to support compliance and monitoring.
- Designed the database architecture and RESTful endpoints for integration with external dashboards and frontend applications.
- Applied secure authentication, authorization, and API best practices to keep the system maintainable and ready to scale.

Web Development Intern

HOSKADEV | *Remote* | *April 2025 – October 2025*

- Completed 320 hours of hands-on remote training in Laravel, React, PHP, and MySQL, earning an Internship Completion Certificate.
- Launched 4 web applications using Laravel and React, expanding the company project portfolio by 20%.
- Delivered 2 client projects on schedule, meeting all agreed requirements.
- Implemented e-commerce features including product catalogs, shopping carts, and secure payment gateway integration.
- Provided technical support, debugging, and troubleshooting to keep deployed web applications stable.

PROJECTS

WorkFlow — Project & Team Management SaaS Platform | *Backend Developer* | *Laravel* | *PHP* | *MySQL* | *REST APIs* | *RBAC* | *AI APIs* | *MCP* | *Website:* workflownets.com

- Contributed as a Backend Developer to a cloud-based SaaS platform for managing projects, tasks, teams, employees, clients, meetings, and business finances.
- Developed backend functionality using Laravel, PHP, and MySQL, including RESTful APIs, authentication, authorization, and role-based access control.
- Contributed to financial workflows (invoices, payments, wallets, and multiple currencies) and to dashboards and analytics.
- Developed AI-powered features: AI Data Import to process and import data into the system, and AI Project Health to analyze project status and identify risks from project data.
- Developed the Meetings module, including meeting management and AI Meeting Summaries that generate concise summaries from meeting information.
- Implemented MCP (Model Context Protocol) integration with Claude, enabling AI to interact with WorkFlow system capabilities and data.

Healthcare Backend API & Audit System | *Laravel* | *MySQL* | *RESTful API* | *RBAC*

- Built a backend API with role-based access control and secure authentication for administrative user management.
- Implemented audit logging and a cloud-ready database architecture supporting administrative monitoring and frontend integration.

Project Management System | *Laravel* | *React* | *MySQL* | *Live system (login required):* managment.hoskadev.com

- Developed a project management platform for project tracking, task assignment, and team collaboration across multiple concurrent projects.
- Built the Laravel backend and MySQL data model with a React interface for managing projects, tasks, and team members.

Clinic Management System | *Laravel* | *MySQL* | *Bootstrap* | *Website:* labbaass.com

- Built a clinic management platform using Laravel and MySQL to handle appointment scheduling and administrative workflows.
- Developed a responsive Bootstrap interface that streamlined appointment scheduling and reduced manual administrative work.

E-Commerce Web Applications | *Laravel* | *React* | *MySQL* | *Payment Gateway Integration*

- Developed online stores with product catalogs, shopping carts, and secure payment gateway integration.
- Built responsive React user interfaces backed by Laravel and MySQL.

Healthcare Tools & Inventory System | *Laravel* | *MySQL*

- Developed an inventory management system for medical tools that improved tracking accuracy and reduced operational errors.

Laravel Explorer — Interactive Learning Game | *HTML5* | *CSS3* | *JavaScript* | *Responsive UI*

- Built a browser-based educational game that teaches beginners the Laravel project structure through an interactive folder map and quizzes.
- Designed four levels (folder exploration, drag-and-drop, request lifecycle, and project building) with a 100-point scoring system.

EDUCATION

Bachelor of Engineering in Computer Systems Engineering

Al-Azhar University | *Gaza, Palestine* | *2021 – 2026*

GPA: 87%

CERTIFICATIONS & TRAINING

- AI & AI Automation Training — UNDP, An-Najah National University & Women's Affairs Center (WAC): hands-on practice with n8n, Microsoft Power Automate, Botpress, OpenAI API, and CRM automation.
- Front-End Web Development Diploma (React JS) — SEF Future, 4-month program
- Internship Completion Certificate (320 Hours) — HOSKADEV, 2025
- AI Certified Freelancer — Taqat Work Platform
